Full Stack Web Developer

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, React, Bootstrap
- Backend: Node.js, Express
- Database: MongoDB
- Tools: Git, VSCode, Postman

PROJECTS

- Blog – A web application built with HTML, CSS, and JavaScript to create, search, and view posts. It includes search by title, post count, and dynamic data storage via forms.

- Cost (Project Manager) – A React application integrated with the JSON Server API to create and manage projects. It allows users to set budgets, allocate services, and monitor spending and progress in real-time.

- Twitter(X) – Developed with React and Tailwind CSS, replicating the basic layout and functionalities.

- Redit-Edit (Communities and Posts Backend) – A Node.js, Express, and MongoDB API for managing communities and posts. It provides endpoints to create, list, and edit posts and comments, with basic authentication and MongoDB integration. Configurations are done via environment variables, following RESTful principles.
